

OVERVIEW

JUNIORS LEARNING APP!

Technology-driven world has touched almost all the fields and all the aspects of life. There are various E-learning platforms and it is also gaining momentum today. However, older generations of teachers are still a part of the present education system that needs sufficient orientation and adaptation to meet the Information of communication and technology demands of the complex day to day life today. In this quarantine situation, we are facing lots of issues in the education field as we can't go to schools or colleges for studies and we can't even know when this will end. Usually, we used to have the face to face interaction with the teachers but for now its not possible also students of 9th to 12th are very depressed as they have to face the boards and because of this COVID-19 they are facing difficulty in their learning as most of the time we don't have the permission the clear our doubts. Also there are many websites or apps that are providing online education but they are not free at all, everything is not available in there website, and platforms who are providing free courses are not clearing the doubts of the students at all. The main issues are they are providing the path of how we are going to start the course they just provide the materials and some boring teachers came to teach them the topic. So we provide free remote education for all. We also provide students to learn or know about new technologies.

We provide a learning platform for small Childrens upto class Four.
